DETAILED ACTION**Response to Remarks**

1. Applicants' arguments and amendments, filed on 3/16/98, have been approved and entered. They have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either newly applied or reiterated. They constitute the complete set presently being applied to the instant application.

**Claim Rejections - 35 USC § 103 (a)**

2. The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

*(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.*

*Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.*

*This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. § 103, the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 C.F.R. § 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. § 102(f) or (g) prior art under 35 U.S.C. § 103(a).*

3. Claims 1-42 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Watson et al. (1992 "Recombinant DNA, Second Ed. Pp. 206-209) in view of Goodchild (Bioconjugate Chemistry, Vol. 1, pp. 165-187, May/June 1990, and Applicant's admissions and in further view of the 1988 Stratagene Catalog.

4. Applicants are having the argument that the references do not teach or suggest the present invention. This is not convincing because Watson teach that "the oligonucleotides are designed to so that each one anneals to two adjacent oligonucleotides". Watson also teaches different component categories such as structural genes or fragments of structural genes. "The domain that bound DNA", "Identifying a functional domain" page 207. Further, it is stated in page 209 col.2: "And the ability to operate on DNA lets us also change the structure of the products gene".

5. **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for response to this final action is set to expire THREE MONTHS from the date of this action. In the event a first response is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than SIX MONTHS from the date of this final action.

6. No claim is allowed.
